

**PRESSURE-SENSOR.com will present an exciting range expansion at Sensor + Test 2013 including semi finished modular products**

**Pressure-Sensor.com**, which together with its Consumer Division, Measurement Limited, is a leading designer of sensor based products, launched their line of industrial pressure products in 2011.

At that time, Steve Petrucelli, Managing Director, commented, “We are excited at the opportunity to partner with customers and provide sensor based solutions that leverage our core MEMS and Electronics technology with our low cost manufacturing.”

Tim Worst, Chief Technologist, added, “We expect to set a new price and performance point for both the array of our standard industrial/commercial pressure sensors as well as full custom and semi-custom pressure sensing devices. This includes quick delivery of concept, standard and custom products.”

Since this introduction the PSC family has made great inroads into the market, the quality and price points making Pressure-Sensor.com products the ideal solution for both standard and custom applications.

New finished sensors will be presented at Sensor + Test 2013

In addition, Pressure-Sensor.com is delighted to announce their new line of SEMI-FINISHED modular products giving customers full flexibility to complete products to their own specifications

**Among the variations we can offer are:**

**1, 2 or 3 PCB versions, with or without tube or connector**

**Maxim or ZMD IC**

**Calibrated or non calibrated versions**

*And other options to meet a wide range of requirements and price points*

**Visit us on stand 12-140 and discuss how we can offer competitive flexible solutions to meet your sensor requirements.**

You will also see products from our range of sensor-based consumer products including tyre pressure gauges and tpms systems.

About Pressure-Sensor.com:

Pressure-Sensor.com designs and manufactures OEM and custom products. Capabilities span a variety of sectors, including automotive, construction, home products and custom OEM opportunities in force, light, sound, temperature, displacement, RF and USB sensor-based products. <http://www.pressure-sensor.com>
